← Diamond: 10

← Corundum: 9

← Beryl: 8

← Quartz: 7

← Feldspar: 6

← Apatite: 5

← Fluorite: 4

← Emerald: 3

← Garnet: 2

← Olivine: 1

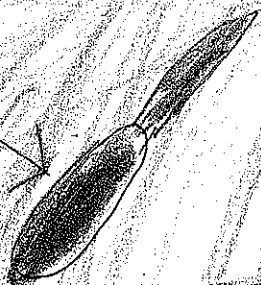

1

hardness scale Description

Did you know that Diamond is the hardest rock. And the softest is talc. talc is number 1 for the softest.

And in the middle is the 5th hardest the name is Apatite. You can scratch it with a Penknife

Penknife

rock

how rocks are made

Rocks are made in many different ways. Igneous rocks are made in volcanoes the magma heats it and puts pressure on the rocks.

in Conclusion
Diamonds are Amazing
Rocks and their are
not alot left so
Keep yours Safe.
