# Snakes

Interdiction

What slides on the ground?

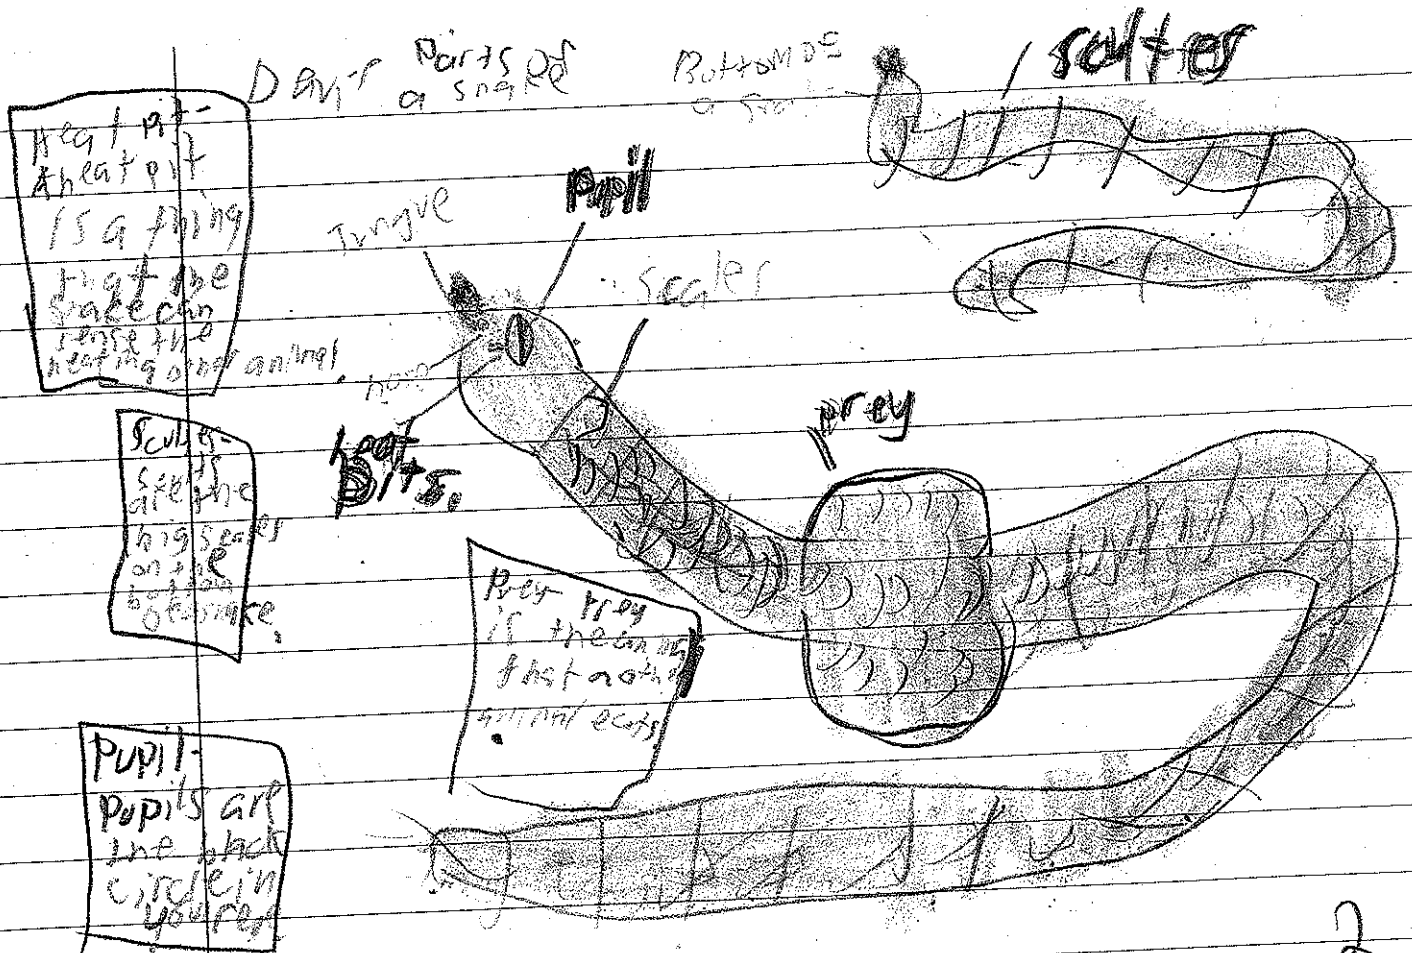

What doesn't blink?

What can be fat or thin?

What can be poisonous?

It's a snake!

1

2

Bodies

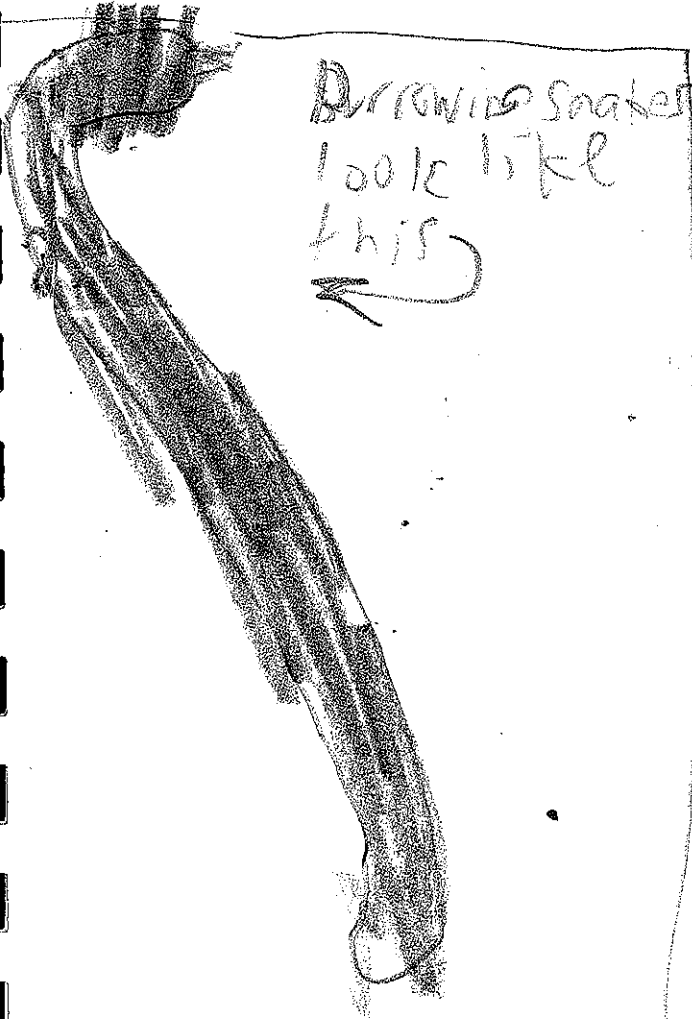

9

Some snakes have heat pits.  
They can sense the heat  
of other animals.  
Heat pits help snakes hunt at night.  
Snakes with round pupils hunt  
at day. Snakes with thin pupils  
hunt at night. Very few snakes  
smell with their noses. Most  
snakes smell with their  
tongue. A snake's ear is  
deep inside its head. Sound  
travels through its bones  
to its ear.

# senses

4

Snakes don't have eyelids.  
Their eyelids are ~~not~~ by  
**transparent** scales. A few  
are **blind**. Burrowing snakes are  
completely ~~eyeless~~ snakes are

Where snakes live.

5

Where snakes live  
Map of the world  
snakes live every where  
except antarctica.

AND other cold places  
like that.

4

what they eat.

6

mostly all snakes eat  
about 30 meals a year.  
Snakes catch their prey with  
their sharp teeth. If a snake  
loses a tooth a new one  
quickly grows in. Cobras,  
vipers and pitvipers have big  
teeth. They are called fangs. Poison  
of snake's fangs some  
poison **paralyzes** their prey.  
Other poisons kill their prey.

## Snakes

Over all, Snakes are amazing animals! You used to think that snakes are slimy, yucky, dangerous. I hope you know that snakes are helpful and most are not dangerous.

# Glossary

8

Transparent - letting light  
go through so things on the  
other side can be clearly seen

Blind - looks like people can  
see but they can't.

paralyze - To cause happening  
or loss of the power of motion of  
any part of the body.

pupils - the black thing  
that is in your eye.

eyelids - a lid that  
washes your eye.
