

Travels to Mackinac

SOURCE A: ALEXANDER HENRY, 1760-1776

Alexander Henry was the first English trader at Michilimackinac. He was taken prisoner during the battle of Michilimackinac in 1763. Henry wrote *Travels and Adventures* in 1809 and it became a classic on American Indian life and the fur trade during that period.

The canoes which I provided for my undertaking were, as usual, five fathoms and a half (33 feet) in length and four feet and a half in their extreme breadth, and formed of birch-tree bark a quarter of an inch in thickness. The canoes are worked, not with oars but with paddles, and occasionally with a sail. To each canoes there are eight men; and to every three or four canoes, which constitute a brigade, there is a guide or conductor. Skillful men, at double the wages of the rest, are placed in the head and stern. They engage to go from Montreal to Michilimackinac and back again, the middle-men at 150 livres (\$25) and the end-men at three hundred livres (\$50) each.

We had not proceeded more than a mile when our canoes became full of water and it was not till after a long search that we found a place of safety. Treading once more upon dry ground, I should willingly have faced the wilderness and all its Indians than embark again; but my guide informed me that I was upon an island, and therefore had no choice before me. We stopped the leaks a second time and recommenced our voyage, which we performed with success, but sitting all the way in six inches of water. In this manner we arrived at the foot of the rapids, where the river was frozen all across. Here we disembarked upon the ice...made a fire and camped.

SOURCE B: ROBERT ROGERS, 1766

Robert Rogers was the commandant at Michilimackinac from 1766 to 1767. These are instructions to Captain James Tute, written September 12, 1766, about the expedition to find the Northwest Passage to the Orient.

You will, from where you winter, early this spring, endeavor to get some good guides from the Sioux and proceed with your party to the Northwest, and make what discoveries you can during the summer, and at the close of which you will fall in with your party to winter at Fort La Parrie, at which place you shall have sent to you a further supply of goods next fall, that you may take of them what is necessary to carry on the expedition.

SOURCE C: NAVAL DEPARTMENT, 1777

By 1777, eleven sailing vessels and one row galley navigated the upper Great Lakes region. All these vessels had been built at Detroit, except the *Welcome* which John Askin constructed in 1775 at Michilimackinac. This is a Naval Department list of those vessels.

Row Galley

SOURCE D: PETER POND, 1773-1775

Peter Pond, originally from Connecticut, was a prominent trader in the Northwest. In 1778 Pond, Alexander Henry and the Frobisher brothers came together to form the famous trading North West Company.

There were two main water routes to Michilimackinac from the east. Voyageurs traveling the northern route, which started in Montreal, headed up the Ottawa River, through Lake Nipissing, over the French River into Georgian Bay, then along the northern shore of Lake Huron to the Straits of Mackinac. Those taking the southern route left Albany on the Mohawk River and headed through Lakes Ontario, Erie and Huron to arrive at Michilimackinac. Peter Pond used both routes, but describes the southern route here. This is an excerpt from Pond's journal describing his travels from New York to Michilimackinac.

In the first place, they were shipped from New York for Albany. From there they were taken up the Mohawk River to Fort Stanwix. There carried a mile by land with the boats and put into Woodcreek and from there through Oneida Lake to a small fort called Fort Erie on the northern side of Lake Erie. Then coasting along the south side of the lake til they come to the mouth of that river, then up to Detroit. From thence up those waters to lake St. Clair, a small one about a14 mile long. From thence cross these waters which come out of Lake Huron and Michigan. There was a British garrison where all the traders assembled yearly to arrange their affairs for the ensuing lodged in good barracks within the stockade, where there is some French buildings and a commodious Roman church where the French inhabitants and British go to Mass.

SOURCE E: CANOE CONTENTS, 1777

This is a list of the contents of one canoe making the voyage from Montreal to Michilimackinac in 1777. It was sent to David McCrea at Michilimackinac by William and John Kay. The original inventory listed the goods by bale, and contained details about color and type of cloth. The different items were distributed throughout the bale so when the trader opened it, he had a wide range of goods for his wilderness customers.

128 blankets	1 slater's hammer
16 cloth strouds	1 pick axe
28 lbs., 8 bunches of beads	2 barrels port wine
16 barrels, 950 lbs. Gunpowder	8 gallons of spirits
168 lbs. of soap	1 barrel, 8 gallons of brandy
8NW fuzils (trade muskets)	8 shot-bags
2 pint jacks	15 empty barrels
8 1/4 lbs. brass wire	1 fuzil case
24 cutteaux croches (knives)	1 soap case
5 sacks, ball	28 lbs. gum for canoe
3 qts. of shot	1 canoe and poles
1 basket copper kettles	1 axe for canoe
1 large canoe kettle	1 sponge and canoe awl
cod lines for canoe	122 lbs. Irish pork
11 ells sheeting for sails	800 lbs., 2 bags biscuits
36 lbs. of hide leather	6 bags for biscuits
3 cod lines for bales	3 bags for pork
1 1/2 ps (pieces) hessen for bales	1/4 lb. of shot
1 skain Holland twine for bales	7 cutting knives
24 half axes	1 ps. Russia sheeting
2 augers	14 yards cotton

SOURCE F: CHARLES MORISON, 1801

Charles Morison was a fur trader. He was writing to John Askin, a merchant at Michilimackinac. Mr. Morison explained that Mr. Fraser, who was another fur trader, couldn't reach Mackinac Island. The straits froze over and the ships couldn't travel. He had to stay with Robert Campbell, owner of the mill at Mill Creek.

The ice closed the 22nd. Mr. Fraser had to stay at Mr. Campbell's 15 days before he got over here, which was the 24th Ulton.

SOURCE G: CHARLOTTE O'BRIEN, 1854

Charlotte O'Brien, wife of an Army chaplain, moved to Fort Mackinac in 1842. She lived there until her death in 1855. Charlotte kept a diary, recording her daily activities and thoughts. This section relates to the events of ships traveling to and from the island. The *E.P. Collins* and *Sultanta* are both boats that traveled the Great Lakes at that time.

October 12, 1854: News of the loss of the E.P. Collins—Oh, how terrible.

October 13, 1854: No boat for below that Lyster could travel on - besides he is not quite well yet—dreadful news of the loss of the steamship Artic with 400 souls on board.

October 14, 1854: No boat. Dearest Mary and the Major left in the horrid Sultanta...May the Lord preserve my darling Mary.

October 27, 1854: No boat—no boat.

SOURCE H: STEAMBOAT ADVERTISEMENT, 1863

This advertisement appeared in the local newspapers in 1863. The steam packets, Meteor and Illinois, stopped at Mackinac Island on their way to Lake Superior.

Leaving Detroit on the day following those above named, at 10 A. M., calling at Port Huron and Sarnia the same evening.

During the months of July and August, the above Steamers will make

GRAND PLEASURE EXCURSIONS,

Leaving Cleveland on their regular days. On these trips they will carry good BRASS AND STRING BANDS, and every effort will be made to secure the comfort and convenience of passengers. Each point of interest on the route will be visited, giving pleasure-seekers an opportunity to fully enjoy the finest, most healthy, and instructive trip on the Continent.

ADVERTISEMENT, 1880s**

The principle line to serve Mackinac Island from Detroit and lake sites was the Detroit and Cleveland Steam Navigation Company. Although it operated locally in Lake Erie and the Detroit River as early as 1850, it was not until 1882 that modern boats began to make regular trips to Mackinac Island. Its fleet included the *City of Alpena* and *City of Mackinac*.

Lesson 11

Using “Travels to Mackinac”

 **Read the “Travels to Mackinac”.**

 **Discuss the following questions with students during or after reading.**

SOURCE A: What do you think it was like to paddle in a voyageur’s canoe? Was it hard work? Was it fun?

Answers vary. To give students a sense of what it was like to be a voyageur, try this: On the floor of a large room, mark a 40’ by 6’ section on the floor, tapered at the ends. Have nine students (eight crew and one guide) sit in this space on their knees. Voyageurs paddle about one stroke per second. Have students paddle that quickly and sing “Pull on the Oars” (see Music at Mackinac lesson plan). You can also pretend to haul bales of fur or supplies on the voyage.

SOURCE B: Why couldn’t explorer’s keep exploring in the winter? Why couldn’t they take all the supplies needed for the whole trip, instead of having more sent to Fort LaParrie?

Travel was dangerous and difficult in the winter. Some waterways froze over and people could not get through with boats. It was wiser to stay in one place and wait for spring. Because travel in even good conditions took a long time, many supplies were needed. It was not practical to carry all the supplies that would be needed, so a supply stop was necessary.

SOURCE C: Compare routes of Peter Pond to that of Jacques and Pierre from lesson plan “Adventures with Jacques and Pierre.

SOURCE D: Since canoes carried furs and trade goods, what do you think these ships were used for?

The ships were used to transport supplies and people to the remote areas of the Great Lakes. Most came from Detroit.

SOURCE E: What are three things found in the canoe that would have been used by a Ojibwa woman? A British soldier? A child living with his family at Michilimackinac?

Each of these people would use a variety of objects from blankets to kettles. The Ojibwa woman would most likely use things like beads for ornamentation of clothing and kettles and knives for cooking and preparing foods and furs for the winter. The British soldier would need the powder and shot for hunting and guarding the fort, blankets for sleeping, the large quantity of pork for meals in the guard house and barracks and paint for maintenance of the fort. The child might use the food, blanket for sleeping and soap for the long awaited baths!

SOURCE F: Why did the ice forming on the lake mean Fraser had to stay with Campbell?

The ships couldn’t travel through the ice, but the ice was too thin to travel on. Travel was weather dependent in many cases any time of the year, but most importantly during the winter.

GLCEs that may be reached in Lesson 11:

3-H3.0.2 Explain how historians use primary and secondary sources to answer questions about the past.

3-H3.0.3 Describe the casual relationships between three events in Michigan’s past.

3-E1.0.3 Analyze how Michigan’s location and natural resources influenced its economic development.

4-H3.0.5 Use visual data and informational text or primary accounts to compare a major Michigan economic activity today with that same or a related activity in the past.

SOURCE G: Charlotte talks about two shipwrecks in October. Do you think she had a good reason to worry about Mary on the “horrid” Sultana?

Travel by ship was dangerous sometimes, just like travel today can be. Charlotte had good reason to be worried since there were two shipwrecks. October and November were the months that were the worst to travel in because of the weather. Recent shipwrecks on the Great Lakes—the Carl D. Bradley near Rogers City and the Edmund Fitzgerald near Whitefish Point—both happened in November. Usually ships were a reliable mode of transportation, but extra care was needed during storms and certain times of the years. Weather prediction has helped sailors in more recent years prepare for bad weather.

SOURCE H & I: Both of these advertisements are for steamship trips to the upper Great Lakes. What is the major difference between the two? How many decades are there between them?

In the earlier advertisement, Mackinac is not listed as a destination, though ships did stop there and people did visit. In the later advertisement, Mackinac Island was the destination. Mackinac Island became the popular tourist spot after the Civil War and was extremely popular in the 1880s. There are two decades between the two advertisements—which shows how things change over a short period of time.

SOURCE J: Steamships that traveled to Mackinac usually left from Detroit, Cleveland, Chicago or some other large city. The trains left from those places, but small towns inbetween as well. What did this mean for tourism in the Mackinac area?

It was easier to get to Mackinac from smaller towns and cities without traveling to the larger cities. It was easier for more people from the smaller areas and more people from the larger areas to come to Mackinac.

 **Use Activity 21 to further support the ideas in the “Travels to Mackinac”.**

Answer the questions using different sources from **Travels to Mackinac**. Not all sources will be used for each question.

1. People traveled to Mackinac for many different reasons. List the sources where the travelers were involved in:

Exploring _____

Fur Trading _____

Visiting/Tourism _____

2. There were many different types of transportation to Mackinac in the 18th and 19th century. What were the different types and what source did you find them in?

TYPE OF TRANSPORTATION	SOURCE(S)
1.	1.
2.	2.
3.	3.
4.	4.

3. List some of the ways travel to Mackinac has changed over time. What ways has it remained the same? Has the purpose of coming changed?
